Subject: Comments on Avoidance Studies report

Hello Hanford Natural Resource Trustees:

We have received comments on the USGS Draft Report "Laboratory evaluation of the behavioral avoidance-preference response of chinook salmon (*Oncorhynchus tshawytscha*) to chromium in the Hanford Reach of the Columbia River, Washington, USA", which were due December 31, 2000.

As stated in the cover letter for the report, you will have the opportunity to discuss questions pertaining to the report at the next HNRTC meeting on January 11. Aaron DeLonay from USGS will be there to present the results of the report.

Barring any substantive issues arising at the January 11 meeting, we are on schedule to complete the final "Avoidance" report by the end of January.

Thanks, and Happy New Year,

Brad
